**Table 1**

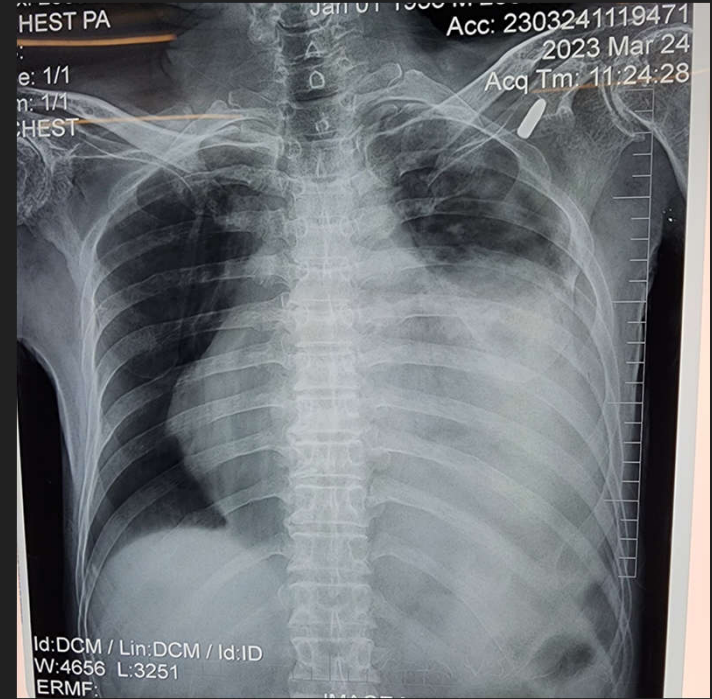

Correlation between EF range value measured by cardiac MRI and EPSS range distance.

<b>LVEF</b>	<b>EPSS range (mm)</b>
Normal ( $\geq 60\%$ )	$\leq 7.3$
Low normal (55-59%)	7.4-8.9
Mild systolic dysfunction (40-54%)	9-13.9
Moderate systolic dysfunction (30-39%)	14-17.1
Severe systolic dysfunction ( $< 30\%$ )	$>17.1$

### **Kết luận**

Khám siêu âm trong Hồi sức - cấp cứu có thể chỉ cần máy siêu âm 2D, cầm tay, ưu điểm khởi động nhanh, mang đi dễ dàng và bác sỹ lâm sàng tự khám siêu âm có thể giúp chẩn đoán bệnh nhanh hơn trong tình huống cấp cứu.
